

## Teaching ideas

The resources available to teachers fall into two categories:

### Book resources:

- Book text
- Book practice questions
- Exam practice questions (EPQs) at the end of each chapter

### Website resources:

- Suggested scheme of work and teaching ideas
- Resources tables for marking/teaching answer construction: 1, 2, 3a and 3b
- EPQ answers and mark schemes for chapters 1–38
- Worksheets for chapters 1–37
- Worksheet mark schemes 1–37
- Case studies in the style of Paper 2 HL and SL questions: based on topic content
- Case study mark schemes with suggested possible answer content

It is suggested that, with the book as the core resource, teachers use the resources in the following way:

Book theoretical content	Core resource
Book practice text questions/examples	Class practice and discussion to reinforce teaching of theory
Worksheets	<b>Either</b> formative exercise <b>or</b> assessment of straight knowledge
Worksheet answers	Marking or revision resource
EPQs	Practice to develop examination technique
Resource tables 1, 2, 3a and 3b	Development of examination technique
Case studies	Assessment of examination technique and topic knowledge (usually cover 1–4 chapters)
