

Markscheme

November 2018

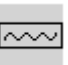

Physics

On-screen examination

This markscheme is **confidential** and for the exclusive use of examiners in this examination session.

It is the property of the International Baccalaureate and must **not** be reproduced or distributed to any other person without the authorization of the IB Global Centre, Cardiff.

The following are the annotations available to use when marking responses.

Annotation	Explanation
	Correct point, place at the point in the response where it is clear that the candidate deserves the mark. For use in analytically marked questions only.
	Omission, incomplete
CON	Contradiction
	Valid part (to be used when more than one element is required to gain the mark)
	Error carried forward
	Dynamic annotation, it can be expanded to surround work
	Horizontal wavy line that can be expanded
	Highlight tool that can be expanded to mark an area of a response

Annotation	Explanation
	Not good enough
	The candidate has given a response but it is not worthy of any marks
	Text box used for additional marking comments
	Seen; must be stamped on all blank response areas and on duplicate pages of concatenated responses
	Vertical wavy line that can be expanded
	Words to that effect
	Award 1, 2, 3, 4 marks. For use in holistically marked questions only

Markscheme instructions

- 1 Mark positively. Give candidates credit for what they have achieved and what is correct. Do not deduct marks for incorrect responses.
- 2 Follow the markscheme provided and award only whole marks.
- 3 Each marking point appears on a separate line.
- 4 The maximum mark for each subpart is indicated in the “Total” column.
- 5 Where a mark is awarded a tick should be placed in the text at the precise point where it is clear the candidate deserves the mark.
- 6 Each marking point in a question part should be awarded separately unless there is an instruction to the contrary in the Notes column.
- 7 A question subpart may have more marking points than the total allows. This will be indicated by the word “**max**” in the Answer column. Further guidance may be given in the Notes column.
- 8 Additional instructions on how to interpret the markscheme are in bold italic text in the Answer column.
- 9 Alternative wording may be indicated in the Answer column by a slash (/). Either alternative is equally acceptable but the candidate cannot be rewarded for both as they are associated with the same marking point.
- 10 Alternative answers are indicated in the Answer column by “**or**”. Either alternative is equally acceptable but the candidate cannot be rewarded for both as they are associated with the same marking point.
- 11 If two related points are required to award a mark, this is indicated by “**and**” in the answer column.
- 12 Words in brackets () in the Answer column are not necessary to gain the mark.
- 13 Words that are underlined are essential for the mark.
- 14 In some questions a reverse argument is also acceptable. This is indicated by the abbreviation *ORA* (or reverse argument) in the Notes column. Candidates should not be rewarded for reverse arguments unless *ORA* is given in the Notes column.
- 15 If the candidate’s response has the same meaning or is clearly equivalent to the expected answer the mark should be awarded. In some questions this is emphasized by the abbreviation *WTTE* (words to that effect) in the Notes column.
- 16 When incorrect answers are used correctly in subsequent question parts the follow through rule applies. Award the mark and add *ECF* (error carried forward) to the candidate response.

- 17** The order of marking points does not have to be the same as in the Answer column unless stated otherwise.
- 18** Marks should not be awarded where there is a contradiction in an answer. Add *CON* to the candidate response at the point where the contradiction is made.
- 19** Do not penalize candidates for errors in units or significant figures unless there is specific guidance in the Notes column.
- 20** Questions with higher mark allocations will generally be assessed using a level response method using task specific clarifications developed with reference to the criteria level descriptors. A candidate's work should be reviewed to determine holistically the mark for each row of the holistic grid and a mark awarded for each row.

Question	Answers	Notes	Total	Criterion	
1	a	speed of sound=330 ms ⁻¹ and speed of light = 300 000 000 ms ⁻¹		1	A
	b	<u>time</u> between lightning and thunder use speed = distance / time to find distance using speed of sound in air	<i>Accept velocity, displacement</i> <i>Can be implied, award separately</i>	3	A
	c	moving with constant / unchanging speed or it is not accelerating any additional point, for example <ul style="list-style-type: none"> • moving towards and then away from student • it passes at a distance of 1 km • it passes overhead 		2	A
	d	values from graph to give 12 (km hr ⁻¹)	<i>Seen or implied</i> <i>Ignore incorrect unit if present</i>	2	A
2	a	<u>electrons are transferred from the small upward moving crystals to the water drops</u>		1	A
	b	R=500 000/20 000 R=25 correct unit Ω	<i>Seen or implied</i>	3	A
	c	ΔQ = I Δt ΔQ = 0.6 (C)	<i>Seen or implied from</i> <i>20 000 x 30 x 10⁻⁶</i> <i>Award 1 mark for 600000 (°C)</i>	2	A
	d	metal is a better conductor / has a lower resistance than buildings current/charge from lightning will flow through the conductor current/charge passes to earth (without passing through building)		3	A

3	a	<p>All three correct</p> <div style="border: 1px solid black; padding: 5px; width: fit-content;"> <p>Draggable:</p> <div style="border: 1px solid black; padding: 2px; display: inline-block; margin-bottom: 5px;"> ${}^0_{-1}\beta$ </div> <div style="border: 1px solid black; padding: 2px; display: inline-block;"> ${}^4_2\alpha$ </div> </div> <p> ${}^{241}_{95}\text{Am} \rightarrow {}^{237}_{93}\text{Np} + {}^4_2\alpha$ ${}^{210}_{84}\text{Po} \rightarrow {}^{206}_{82}\text{Pb} + {}^4_2\alpha$ ${}^{240}_{93}\text{Np} \rightarrow {}^{240}_{94}\text{Pu} + {}^0_{-1}\beta$ </p>		1	A
	b	<p>atomic number = 107</p> <p>mass number = 270</p> <p>bohrium or Bh</p>	Award all marks independently	3	A
	c	<p>high energy or high frequency or short wavelength</p> <p>electromagnetic waves or radiation or photon</p>	Do not accept particle	2	A
	d	<p>Carbon-14</p> <p>after 10 000 years the change in abundance will be noticeable</p> <p>or</p> <p>the half-life is appropriate to the situation</p> <p>it exists in nature</p>	WTTE	3	A

<p>4</p>	<p>a</p>	<div style="background-color: #00A0C0; color: white; padding: 2px;">Image Object</div> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 33%;">Independent variable</th> <th style="width: 33%;">Dependent variable</th> <th style="width: 33%;">Control variables</th> <th></th> </tr> </thead> <tbody> <tr> <td><input type="checkbox"/></td> <td><input type="checkbox"/></td> <td><input checked="" type="checkbox"/></td> <td>Drop height</td> </tr> <tr> <td><input checked="" type="checkbox"/></td> <td><input type="checkbox"/></td> <td><input type="checkbox"/></td> <td>Internal air pressure</td> </tr> <tr> <td><input type="checkbox"/></td> <td><input checked="" type="checkbox"/></td> <td><input type="checkbox"/></td> <td>Bounce height</td> </tr> <tr> <td><input type="checkbox"/></td> <td><input type="checkbox"/></td> <td><input checked="" type="checkbox"/></td> <td>Size of ball</td> </tr> <tr> <td><input type="checkbox"/></td> <td><input type="checkbox"/></td> <td><input checked="" type="checkbox"/></td> <td>Bouncing surface</td> </tr> <tr> <td><input type="checkbox"/></td> <td><input type="checkbox"/></td> <td><input checked="" type="checkbox"/></td> <td>Material of the ball</td> </tr> </tbody> </table> <p>Independent: only internal air pressure chosen</p> <p>Dependent: only bounce height chosen</p> <p>Two control variables correct</p> <p>All control variables correct</p>	Independent variable	Dependent variable	Control variables		<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Drop height	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Internal air pressure	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Bounce height	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Size of ball	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Bouncing surface	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Material of the ball	<p style="text-align: center; font-weight: bold;">4</p>	<p style="text-align: center; font-weight: bold;">B</p>
